NOTICE TO MARINERS No. 5/2026

River Hull – Scale Lane Bridge

MARINERS ARE ADVISED that Scale Lane Bridge will be swung open to navigation at approximately 1300 BST on Monday 20 April 2026 and remain in that position for two tides.

The bridge will then be swung back to the closed to navigation position on Tuesday 21 April and remain in that position for a number of weeks whilst essential engineering refurbishment of the turning mechanism is undertaken.

During this period the bridge will remain in the closed to navigation position and it will NOT be possible to swing it at all.

Any craft which can safely navigate under the bridge may continue to do so providing that due consideration has been given to their air draft and height of tide and the usual notice has been given to the Harbour Master's Office.

The owners of any craft which would require a swing of Scale Lane Bridge to facilitate their passage may obtain the latest update from the Harbour Master's Office and then plan their passage to follow the completion of the refurbishment works.
