NOTICE TO MARINERS No. 15/2026

River Hull – Ennerdale Bridge

MARINERS ARE ADVISED that a number of electrical power cuts in the area over the weekend have resulted in a **total failure of the bridge control system at Ennerdale Bridge.**

Efforts are being made by the in-house team to rectify the problem but specialist assistance may be required.

Mariners are therefore WARNED that, at present, Ennerdale Bridge cannot be lifted.

Mariners who can safely pass under the bridge in the “closed to navigation” position may continue to do so subject to careful consideration, as always, of their air draft and height of tide when planning their passage.
