NOTICE TO MARINERS No. 17/2026

River Hull – Stoneferry Bridge – temporary suspension on lifting

MARINERS ARE WARNED that there is a temporary restriction on lifting of Stoneferry Bridge whilst Humberside Fire Brigade have hoses arranged across the bridge span to assist with tackling the aftermath of a serious fire on an adjacent industrial estate.

The hoses are expected to remain in place until Friday evening, 14 August 2026.

Mariners who can safely pass under the bridge in the “closed to navigation” position may continue to do so subject to careful consideration, as always, of their air draft and height of tide when planning their passage.

Mariners who require a bridge lift to facilitate their passage should contact the Harbour Master’s office to ascertain the latest situation.
